

AVINASH DUBEY

Data Analyst | Power BI Developer | Noida, Delhi NCR

+91-7007682626 | dubeyavinash157@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) |

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience in SQL, Power BI (DAX, Power Query), Python, and Advanced Excel, specializing in dashboard development, KPI reporting, and business intelligence across Retail, E-Commerce, and Consumer Goods domains. Delivered retail sales analysis covering \$20M+ in revenue and performed customer risk analysis across 2,389 customers. Experienced in data validation and workflow automation, with working knowledge of SQL-based data warehousing and cloud-based data storage.

TECHNICAL SKILLS

Languages & Querying: SQL (T-SQL, MySQL, CTEs, Window Functions, Stored Procedures), Python (Pandas, NumPy)

Databases & Cloud: Snowflake (Data Warehousing, Querying), AWS S3, SQL Server (SSMS), MySQL

Data Visualization & BI: Power BI (DAX, Power Query, Power BI Service, Power BI Gateway, Dashboard Development), Microsoft Excel (Power Pivot, XLOOKUP, Pivot Tables)

Data Engineering & Analysis: ETL, Data Extraction, Data Cleaning, Data Transformation, Data Validation, Data Integration, Data Quality, Exploratory Data Analysis (EDA), Reporting Automation

Analytics & Business Insights: Business Intelligence, KPI Tracking & Reporting, Customer Segmentation, Churn Analysis, Trend Analysis

Data Modeling: Dimensional Modeling (Star Schema, Fact & Dimension Tables)

Tools & Platforms: Jupyter Notebook, Git, GitHub, VS Code, AI-Assisted Analytics

PROFESSIONAL EXPERIENCE

Data Analyst | i3 Infosoft Pvt. Ltd, Noida, U.P.

Jul 2023 – Present

- Created interactive Power BI dashboards using DAX and Star Schema data models, giving business users across multiple departments self-service access to KPIs in place of manual reports.
- Built reusable DAX measures for KPI calculations, enabling consistent reporting across Power BI dashboards.
- Transformed 100K+ records per month from SQL Server, Excel, and flat files using Python (Pandas) and Power Query, ensuring data consistency for downstream analysis.
- Validated datasets and monitored KPI consistency across production dashboards used for executive reporting, cutting data errors reaching leadership by roughly 15%.
- Optimized complex T-SQL queries (CTEs, window functions, joins, subqueries) to process large datasets, cutting average query runtime by roughly 20% and speeding up insight generation.
- Delivered ad hoc analysis and collaborated with 4 cross-functional teams (Sales, Marketing, Finance, Operations) to gather requirements and support business decisions.
- Automated recurring reporting workflows using Power Query and SQL, cutting manual effort by 30–40% (~15 hrs/week).

Data Specialist | Star Entertainment Production, New Delhi

Aug 2019 – Jun 2023

- Managed daily production and business data in Microsoft Excel for a 15+ member production team, tracking 200+ records weekly and maintaining data integrity across operations.
- Generated 20+ daily and monthly production reports for 3 internal departments, coordinating with team leads to support planning and operational decisions.

KEY PROJECTS

Retail Sales & Customer Insights

- Designed a Power BI dashboard using Star Schema, DAX, and Power Query to monitor retail sales and customer performance KPIs.
- Analyzed \$20M+ in retail sales data, identified a 46.9% YoY sales growth trend, and reduced manual reporting time by 3–4 hours per day through interactive dashboards.

Customer Churn & Revenue Risk Analysis

- Developed a customer revenue risk analysis solution using SQL and Python (Pandas) for data cleaning, integrating and analyzing data from multiple sources for customer risk assessment.
- Identified 2,389 at-risk customers through customer segmentation and payment failure analysis, enabling the business to prioritize high-risk accounts for timely intervention.

EDUCATION

Bachelor of Science in Mathematics

Chhatrapati Shahu Ji Maharaj University, Kanpur, U.P. | 2012 - 2015
